Pandemic Management Plan

Catholic Homes recently launched its Pandemic Management Plan, the outcome of extensive work reviewing the literature and relevant policies.

The recent outbreak of swine flu, transmitted through human to human contact, increases the risk of a pandemic and heightens the need for all organisations to be prepared. Our effectiveness depends on working in unison to manage this risk.

The Catholic Homes Pandemic Management Plan may assist you to prepare. It is available on CD and includes:

- Pandemic Management Plan (Microsoft Word file) – including information about transmission, pandemic phases, the roles of Governments, relevant legislation, HR issues, personal protective equipment, and checklists for the three pandemic phases (preparedness, alert and pandemic);
- Infection Control Policy and Procedure (Microsoft Word file); and
- Relevant Posters (PDF files), resources and references.

Catholic Homes provides this as a resource but we are not liable for decisions or actions taken by organisations on the basis of reference to this resource.

Order & Tax Invoice
